**Hood, doors and tonneau :**

Black

**Mileage :**

26000km

**Remarks:**

This car is one of the 25 RS-versions ever built. The spectacular RS is a tribute to the prestigious triumph at the Nordschleife in both 2004 and 2005 when Donkervoort broke the lap record for production cars. The D8 270 RS is directly related to the record-breaking car and is, therefore, an addition to the existing product line. Only 25 models of the car have been produced, of which each country had only a limited number available. As a result of technical modifications, the D8 270 RS accelerates from 0 to 100 km/hr in less than 4 seconds. The top speed is 250 km/hr. The braking capacity has also been adapted to the increased power; specially ventilated and grooved brake disks increase the braking capacity of the car. You can brake from 100 km to a standstill in just 2.4 seconds. The car comes with a Certificate of Authenticity, 6-point harnesses, Stack-system and "Cup" roll-over bar. Has had the special GT4-based RS-update in 2009.

**Price:**

€ 95.000,- incl.VAT - 2006

Parc Créalys  
Rue Saucin, 84  
5032 Gembloux - Belgium
